

## **TurboDemo 7.5 – Professional video creation in a few minutes!**

---

**Reutlingen, 14 November 2007 – \*NEW\* TurboDemo 7.5** – Try the new version with its special features!

**Explain software, PC-applications and websites with your own animated demos, simulations and tutorials – without any programming knowledge!**

The user can capture screenshots and audio at the same time and work on it afterwards (f. ex. adding balloons or interactive text objects as well as audio and video elements). One of many functions of TurboDemo is that it is capable of capturing screenshots, which can subsequently be edited in a single slide mode the program provides. The demos can be generated in the formats of Java/ Flash, Exe, Windows Media Player etc.

TurboDemo is very user-friendly and even at your first application the creation of animations or interactive Demos which can be published per CD, email or video is very easy. The program enables you to build product presentations for clients as well as e-learning training courses for employees. Even at universities students can be taught on- or offline with the help of TurboDemo. Further more it is ideal for creating tutorials and explaining software or websites.

The new version TurboDemo 7.5 impresses by the following innovations:  
Now the user is able to select the audio quality in the ASF format as well. Further more new Flash navigation bars and new skins for balloons and notes were added. With SkinStudio In no time at all TurboDemo can create individual balloons, text objects etc. to be included in TurboDemo projects.

The following versions of TurboDemo are available:

- ◆ TurboDemo Standard
- ◆ TurboDemo Professional
- ◆ TurboDemo Studio
- ◆ TurboDemo Enterprise
